### Caverion provides building solutions to new buildings at the Technopolis Ozas office campus in Vilnius, Lithuania

Caverion has signed a contract with Mitnija, the largest construction company in Lithuania, for design and installation of building solutions for two newly constructed buildings at the Technopolis Ozas office campus in Vilnius, Lithuania. The value of the contract is approximately EUR 7 million. Caverion is responsible for the design & engineering as well as project management and project execution. The developer of the project is international office real estate owner, operator and development company Technopolis Plc.

The contract covers the technical disciplines of heating and sanitation, cooling, ventilation and air conditioning, security and safety systems and automation. The total area of buildings is 25.000 m<sup>2</sup>. The two new buildings will complement Technopolis Ozas campus and construction works are scheduled for completion in autumn 2016.

“Caverion is a professional company, known for its excellence and reputation in the market. We are committed to working with business partners that share the same values and culture as we do. This is why we have chosen Caverion as our partner for the Technopolis project. We have to be sure we deliver the best quality of services to our client on agreed time and within agreed budget. I hope we will have great cooperation with Caverion, which will result into the long-term partnership,” says **Julius Gendvilis**, Managing Director of Mitnija construction company.

“Our target is to accomplish the project together with the project’s general contractor over the next 14 months. Our project team is ready to propose and implement the buildings’ solutions, which help to meet LEED rating systems criteria to ensure energy efficiency and optimal working conditions,” says **Niclas Sacklén**, Group Senior Vice President and CEO of Division Eastern Europe.
